Pannoramic 250 Flash

Welcome the Pannoramic 250 Flash, the next generation of digital slide scanners! Featuring new, faster scanning technology with the award-winning* Pannoramic image quality it is the ultimate scanning solution that easily meets your needs, from high quality to high capacity.

Features

NEW! Flash scanning technology

Experience more than twice as fast scanning compared to the first series of Pannoramic scanners (SCAN, MIDI and DESK) while containing the same industry-best image quality.

Motorized objective and camera changer

Now you can have a 20x and a 40x high quality Zeiss Plan-Apochromat objective in the scanner and also a camera for brightfield and one for fluorescence which you can change with a mouse click.

Loadability

You can load up to 250 slides into the Pannoramic 250 Flash. The cover makes sure that no more light is shed upon your slides than what is necessary, so it is safe for your immunofluorescent stained samples, too. The reworked slide loader allows for slides ranging from 0.9 to 1.2 mm of width.

Fluorescence

New illumination system, new monochrome camera and darkfield preview elevate fluorescent scanning to a new level.

Quality

The Pannoramic 250 Flash supports the best Carl Zeiss objectives, ranging from 20x to 40x magnification. We achieve an industry best pixel resolution of 0.22 $\mu\text{m}/\text{pixel}$ with a 20x objective.
